

# FADY WAFANAGY

## Front-End Software Engineer

Cairo, Egypt | fadywafaa36@gmail.com | +20 127 763 6901 | [GitHub](#) | [LinkedIn](#)

### PROFESSIONAL SUMMARY

---

Frontend Software Engineer with 4+ years of experience building production-grade SaaS applications using React and TypeScript. Experienced in frontend architecture, performance optimization, state management, API integration, and modernization of large-scale applications. Hands-on experience building scalable, maintainable frontend systems for high-traffic logistics platforms.

### WORK EXPERIENCE

---

#### Frontend Software Engineer

Azdan, Dubai (Remote) | Nov 2022 – Present

##### Project: [SuiteFleet](#) — Multi-Tenant Logistics SaaS Platform

Contribute to a high-traffic B2B logistics platform supporting end-to-end fleet and delivery operations, including task management, route planning, driver operations, analytics, reporting, RBAC, and multi-tenant workflows. The platform includes an interactive dispatch workbench that visualizes drivers, delivery tasks, shifts, hubs, geofences, and task clusters on a map, enabling dispatchers to manage and assign operations geographically. The production platform processes 1M+ requests daily across its infrastructure.

- Led the migration of a large-scale production frontend from React 16 to React 19 and TypeScript, reducing technical debt and improving maintainability through reusable, modular components.
- Improved application performance by 20% through Lighthouse-driven optimization, including code splitting, lazy loading, bundle optimization, caching, and rendering improvements.
- Restructured frontend modules into a scalable feature-based architecture with reusable UI/form abstractions, improving separation of concerns, maintainability, and feature delivery.
- Integrated typed REST APIs and production authorization flows, including role-based access control (RBAC), multi-tenant behavior, error handling, and English/Arabic RTL support.
- Optimized data-heavy React interfaces by reducing unnecessary re-renders and improving component, list, and grid rendering strategies for smoother user interactions.
- Collaborated with Product Managers, UI/UX Designers, and Backend Engineers to translate business requirements into responsive, accessible, production-ready logistics features.

#### NetSuite Developer

Azdan, Dubai (Remote) | Nov 2021 – Nov 2022

##### • Clients: Alliance Global • Deyaar • Naga • Diamond Group • Al Khaleej Training & Education.

- Developed and customized NetSuite ERP solutions using SuiteScript 2.1.
- Built and maintained custom workflows, forms, and business logic supporting operational processes.
- Built React-based interfaces integrated with NetSuite services, connecting frontend functionality with ERP workflows.
- Collaborated with business stakeholders to automate operational workflows and improve process efficiency.

#### Freelance Frontend Developer

Remote | Project-based

- Developed frontend interfaces and small web applications using JavaScript and React for independent client and academic projects.
- Supported university students with graduation projects by explaining frontend concepts, reviewing implementations, and helping structure user interfaces and application flows.
- Provided one-to-one frontend mentoring and technical guidance to learners and junior developers in Gulf-region communities, covering HTML, CSS, JavaScript, React, debugging, and project implementation.

## TECHNICAL SKILLS

---

**Frontend:** React.js, React 19, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3  
**UI & Styling:** Tailwind CSS, shadcn/ui, Material UI, Bootstrap, 3D(Gsap, Three.js)  
**State & Data:** React Query (TanStack Query), Zustand, Redux Toolkit, REST APIs, OpenAPI Integration  
**Data-Heavy UI:** AG Grid, Infinite/Server-Side Data Loading, Filtering, Sorting, Bulk Operations, Data Export  
**Performance:** Lighthouse, Core Web Vitals, Code Splitting, Lazy Loading, Bundle Optimization, Rendering Optimization, Caching, CDN  
**Architecture:** Feature-Based Architecture, Component-Based Architecture, Modular Architecture, Reusable Component Design, Scalable Frontend Architecture  
**Backend & APIs:** Node.js, Express.js, REST APIs, GraphQL  
**Practices:** Accessibility (WCAG), RBAC, API Integration, Code Reviews, Frontend Scalability  
**Developer Tools:** Git, GitHub, npm, Vite  
**Soft Skills:** Cross-functional Collaboration, Mentoring, Problem Solving, Technical Communication

## EDUCATION

---

**Bachelor's Degree — Systems and Information | Future University - Cairo, Egypt**  
*Jan 2012 – Jun 2016*

## COURSES & PROFESSIONAL TRAINING

---

**Intensive Software Engineering Training Track — Route Academy**  
*May 2020 – Oct 2021*  
Completed a rigorous full-time program covering Full-Stack development (MERN), algorithms, data structures, and collaborative engineering workflows.

## LANGUAGES

---

Arabic — Native • English — Intermediate
